Custom SEG Fabric

Artwork setup and custom-size templates

1. Measure the visible graphic area of your compatible frame.
2. Enter width and height in inches on the product page.
3. Choose Non-Lit or Backlit fabric.
4. Download the template generated for your exact size.
5. Build artwork at that size without additional bleed.

Maximum size: 480 x 120 inches, in either orientation.

Do not add an allowance for the silicone edging.

Supply one single-page PDF or JPEG in CMYK.

Use 150 PPI raster images and outline all fonts.

Remove all template guides and omit crop marks.

This letter-size document is an instruction sheet,

not an artwork canvas. Use the custom-size download below.
