TRANSLUCENT BACKLIT FILM

NTXPrint | Custom-size artwork setup

Select your dimensions and download the exact-size template.

Artwork size equals ordered size. No added bleed.

Maximum size: 59 x 1200 inches, in either orientation.

Measure your lightbox or sign opening before choosing a size.

Use one single-page CMYK PDF or JPEG.

Prepare raster artwork at 150 PPI at final size.

Outline fonts and extend backgrounds to all edges.

Keep essential content at least 0.25 inch inside the cut edge,

or farther in if your frame covers more of the print.

Remove template guides, crop marks and instructions.

Non-adhesive 10 mil film; hardware is not included.
