Translucent Adhesive Vinyl

Custom-size artwork guide

Choose your dimensions and single- or double-layer printing.

Download the exact-size template from the product page.

Build artwork at the ordered dimensions. Do not add bleed.

Maximum 52 x 1908 inches, in either orientation.

Use inches with up to two decimal places.

This is 3 mil translucent vinyl for illuminated sign faces.

Includes a 2.5 mil matte protective overlaminate.

Single-layer printing is intended for daytime viewing.

Double-layer printing adds color density for nighttime viewing.

A white acrylic sign face is recommended for light boxes.

Supply one single-page PDF or JPEG; CMYK, 150 PPI.

Outline fonts and convert spot colors to CMYK.

Remove all template lines, labels and crop marks.

Extend background colors to every edge.

Allow space between important text and the finished edges.

The green guide is a suggested inset, not added bleed.

Apply to a clean, smooth, flat sign face. Permanent adhesive.

Final size, production availability and shipping are reviewed.
